NEED ANALYSIS (Why the procurement was necessary?)	Initial in-house 2D processing upto PSTM level was completed in 2016-2017. Furthermore, in house 2D re-processing job was also carried out in 2019 to address the structural complexities and improve subsurface imaging.  In spite of these efforts, the subsurface imaging remained still poor due to complexity identified on available processed data but cannot be mapped due to poor imaging.  In order to enhance the confidence level of the interpretation, delineation of the leads and to better understand the complex subsurface structural geometry, case was outsourced.
