- NEED ANALYSIS (Why the procurement was necessary?) _____
The Technical Committee recommended replacement of a decade old data centre hardware architecture procured in June, 2011 for a decentralized data centre environment (07 data centres including 01 AGPR, 06 Provincial AGs and a disaster recovery site) to a centralized data centre with Primary Site at AGPR, Islamabad and DR Site with Centralized Connectivity to Provinces to reduce operational cost of running 57 server BASIS machines at 7 sites with separate connectivity to a centralized site primary and DR sites by using 17 BASIS server machines with direct connectivity. The entire hardware has completed its shelf life in 2021 and its support service is ending by the HP (Manufacturer) in 2023. Thus timely replacement of hardware and migration of sensitive financial data from old hardware technology architecture to new hardware technology was critical.
