- NEED ANALYSIS (Why the procurement was necessary?)
- a. The growth in telecom sector, especially new technologies, allocations in higher frequencies and high teledensity, has made essential to expand and upgrade the monitoring system of Frequency Allocation Board. The phenomenal increase in the radio spectrum activity necessitate strict monitoring and license enforcement to ensure interference free operations of all the users of the spectrum. Access of mobile operators in Faisalabad and surroundings has necessitated the additional requirement of monitoring station for which existing equipment is less.
- b. Thus the project was prepared keeping in view the urgent requirements of monitoring station in Faisalabad, which will contribute towards better spectrum management and control in future, thus increasing the revenue generation for the government exchequer.
