The submersible geophone strings, are consumable in nature. Currently, 05 No. seismic parties are working in different areas of Pakistan and this type of earphone strings are used in seismic field parties in marshy /water logged area like ponds,lakes,dams etc. up to depth of 15 meters to pick seismic signals under water for 2D/3D seismic acquisition. These are frequently shifted from one place to another during operation and become damage/non service able with passage of time.
