ł	 the performance and productivity of the equipment offered; and/or; other specific criteria indicated in the TBS and/or in the Technical Specifications.
	 For factors retained in BDS, pursuant to ITB 33.4 one or more of the following quantification methods will be applied, as detailed in the BDS: Inland transportation from EXW/port of entry/border point, Insurance and incidentals:
	Inland transportation, insurance, and other incidental costs for delivery of the goods from EXW/port of entry/border point to Project Site named in the BDS will be computed for each Bid by the

	transportation time. Treating the Bid resulting in such time of

arrival as the base, a delivery "adjustment" will be calculated for other Bids by applying a percentage, specified in the BDS, of the EXW or as per applicable INCOTERM price for each week of delay beyond the base, and this will be added to the Bid price for evaluation. No credit shall be given to early delivery. OR ii) The goods covered under this invitation are required to be delivered (shipped) within an acceptable range of weeks specified in the Schedule of Requirement. OR iii) The goods covered under this invitation are required to be delivered (shipped) in partial shipments, as specified in the Schedule of Requirements. Deviation in Payment Schedule С. Bidders shall state their Bid price for the payment schedule i) outlined in the SCC. Bids will be evaluated on the basis of this base price. Bidders are, however, permitted to state an alternative payment schedule and indicate the reduction in Bid price they wish to offer for such alternative payment schedule. The Procuring Agency may consider the alternative payment schedule offered by the selected Bidder. OR ii) The SCC stipulates the payment schedule offered by the Procuring Agency. If a Bid deviates from the schedule and if such deviation is considered acceptable to the Procuring Agency, the Bid will be evaluated by calculating interest earned for any earlier payments involved in the terms outlined in the Bid as compared with those stipulated in this invitation, at the rate per annum specified in the BDS. d. Cost of Spare Parts i) The list of items and quantities of major assemblies, components, and selected spare parts, likely to be required during the initial period of operation specified in the BDS, is annexed to the Technical Specifications. The total cost of these items, at the unit prices quoted in each Bid, will be added to the Bid price. OR ii) The Procuring Agency will draw up a list of high-usage and highvalue items of components and spare parts, along with estimated quantities of usage in the initial period of operation specified in the BDS. The total cost of these items and quantities will be computed from spare parts unit prices submitted by the Bidder and added to the Bid price. OR

		g. <i>Performance and productivity of the equipment.</i>
		(i) Bidders shall state the guaranteed performance or efficiency in
		response to the Technical Specification. For each drop in the

		BDS will be added to the Bid Price, representing the
		capitalized cost of additional operating costs over the life of
		the plant, using the methodology specified in the BDS or in
		the Technical Specifications. OR
		(ii) Goods offered shall have a minimum productivity specified
		under the relevant provision in the Technical Specifications
		to be considered responsive. Evaluation shall be based on the

		the methodology specified in the BDS or in the Technical
		Specifications.
		h. Specific Additional Criteria
		Other specific additional criteria to be considered in the evaluation

	In such cases, the Procuring Agency may allocate certain weightage to these factors
