

OIL AND GAS REGULATORY AUTHORITY

SELECTION OF CONSULTING FIRM FOR ROAD SURVRY OF PRIMARY AND SECONDRY FREIGHT AREA/ SPECIAL FREIGHT AREAS (SFAs)

1. OGRA invites reputable firms, registered with Pakistan Engineering Council, having minimum of fifteen years' experience for conducting of Road Surveys, Road Infrastructure Assessment, Routes identification, Road distance measurement (Physical Measurement/, Global Positioning System (GPS) / Geographical Information system (GIS), digital mapping, Remote sensing etc.), petroleum product logistic, Physical site inspection for the subject task.
2. Selected Firm shall complete the assignment within 120 days of the award of the contract.
3. Interested firm must provide detailed CV(s) of member(s) of core team highlighting relevant experience and specific expertise. The final selection of the firms shall be subject to the interviews of the core team members.
4. The applicant has not been declared blacklisted or debarred by any local procuring agency and/or foreign country, international organization, and/or other foreign institutions. The applicant to provide the undertaking in the form of an affidavit to the above effect.
5. Method of selection will be Least Cost basis following technical evaluation in line with section 3 (C) of the PPRA Regulations of Consultancy Services Regulation 2010. The Financial Bid should contain a lumpsum figure, inclusive of all charges, out of pocket expenses and taxes. Conditional bids shall not be accepted;
6. OGRA invites the Electronic Technical and Financial Proposals (separately) from the eligible firms, registered with Income Tax and Sales Tax Department. The subject bidding document containing detailed requirements, scope of the services /terms of reference and evaluation criteria is available for the registered bidders on EPADS at (www.eprocure.gov.pk) and also can be obtained from the OGRA website www.ogra.org.pk and PPRA website www.ppra.org.pk..
7. Bidders should submit the electronic proposals Technical and Financial, prepared in accordance with the instructions in the documents and be submitted through EPADS on April 21, 2025, 10:00 AM. Manual bids, shall not be accepted. The electronic Technical Proposal/EOI will be opened on the same day by using EPADS (opening time 10.30 AM). The bids will be evaluated based on single stage-two envelope procedure under PPRA rules 36(b) 2004.
8. Before the award of contract, the successful bidder shall execute a performance guarantee equal to mobilization advance, if any, and 10% of bid amount. The guarantee shall be released after the submission of Final Report.
9. OGRA reserves the right to reject all the bids as per rule 33 of the PPRA Rules, 2004.

Senior Executive Director (Finance)

Oil & Gas Regulatory Authority

Plot No. 37 & 39, Mauve Area, Sector G-10/4, **Islamabad.**

ROAD SURVEY OF PRIMARY AND SECONDRY FREIGHT AREA (SPECIAL FREIGHT AREA-SFA)

SCOPE OF WORK

1. INTRODUCTORY BACKGROUND

Oil & Gas Regulatory Authority computes the Inland Freight Equalization Margin (IFEM) in respect of all Oil Marketing Companies (OMCs), currently on fortnightly basis. IFEM is a mechanism whereby weighted average transportation cost of the OMCs in connection with movement of petroleum products (i.e. Petrol, HSD, Kerosene, LDO etc), from all modes, is computed to equalize uniform pricing throughout the country. The transportation cost by Road, takes into account the Freight Charges which are determined based on the cartage rate and Round-Trip Distance (RTD) in respect of a predefined routes, and categorized into 'plain' or 'hilly' areas. The existing Primary Freight chart showing the RTDs with nature of the route (plain/hilly) is at **Annex-I**.

2. The **Primary Transportation/freight** cost of Petroleum Products involves the movement of commodity from source¹ to depot locations² (**Annex II**) and the cost of the same is aggregated in the IFEM pool. The Secondary transportation is about the movement of petroleum products from Oil depots/oil terminal to retail outlets and the same is not part of IFEM (deregulated). However, to the extent of SFAs (**Annex III**), such cost is part of IFEM and included in the primary transportation. Special Freight Areas (SFAs), approved by the Government much time ago, were underdeveloped, far-flung, remote areas with difficult access for which different size of Tank Lorries (TLs) were used. These areas include parts of Baluchistan, Azad Jammu & Kashmir and the Northern Areas. Secondary Freight for these special areas is reimbursed through IFEM mechanism to provide relief to the consumers of special areas. For the sake of convenience, the google coordinates in respect of PSO' retail outlet sites in these respective areas, for location purpose, is at (**Annex IV**).

3. As per various Economic Surveys of the Government, NHA/PHA' data available over the websites, the country has witnessed substantial infrastructure development, which includes the construction of Motorways, Highways, Tunnels, Roads & Coastal Highway in the northern areas and other parts of the Country. The landscape has changed over the past years leading to better road quality, reduced distances and efficient transportation which has impact on the freight cost since freight cost considers the RTDs of the optimal route and fuel consumption which is relevant to the condition of the Roads/routes.

4. As a result of above-mentioned infrastructure developments in the country, it has become inevitable to reassess the possible routes and Road conditions alongwith necessary allied information.

2. Objective of Task

- **To get most Suitable Routes:** To identify most economically efficient, viable and safe routes (original and alternate) for each destination;
 - From source to Depot/Terminal- Primary Freight Areas;
 - From Depot to Retail outlet – Special Freight Areas (SFA)/Secondary Freight

¹ Ports at Karachi, five Refineries (**South:** National Refinery Limited, Pakistan Refinery Limited, Cnergyico Petroleum Limited. **Mid Country:** Parco. **North:** Attock Refinery Limited and Terminals at the pipelines (Keamari, Shikarpur, Mahmood Kot, Gatti and Machike)

² 23 Locations at present across the country.

- Suitable size of tank lorries (loading capacity) with optimum fuel consumption rate for each route.

Note: The RTDs/data is expected to be synchronized with the Government published information as well.

- **To get accurate Round Trip Distance (RTD):** To get accurate RTD in respect of each identified route(s) (original and alternate) from;
 - source to depots locations (primary freight)
 - from depots/terminal to retail outlets (secondary/SFA) across the country.
- **To get current Road Condition:** The segment/patches of each route as per its current surface condition as [normal metallic/carpeted/concrete/katcha, narrow, wide, hilly etc) needs to be measured.
- **To get specific re-assessment of SFAs sites.** (At present, there are approximately 213 sites as SFA. Re-assessment of the same is desired based on current infrastructure and developments.

3. SCOPE OF WORK

The scope of this survey (Primary Freight Area and Special Freight Areas) will focus on the objective of the task and cover the following:

3.1 Review of Round-Trip Distances (RTD)

3.1.1 Data Collection

- Gather the data in respect of transportation routes including geographical maps, GPS data, Google Coordinates showing the distance of various routes, analyzed in the light of Government published data.
- Collect the information relevant to route selection, considering the influencing factors such as distance, road conditions, traffic situation, tolls, law & order situation etc;
- Collect the information from Government statistic about the economic and social conditions of the SFA locations keeping in view the infrastructure development.
- Data pertaining to Infrastructure Risk Assessment and its possible consequences (land sliding, snow fall, floods etc;).

3.1.2 Route Selection and Distance calculation

- Identify all potential routes for round trip transportation based on the source and destination points. In case of Primary Freight Areas, the source destination is Refineries / Ports/Terminals to OMCs Oil depots while in case of Special Freight Areas, the source destination is Oil Depot/Terminal to Retail Outlet.

Note: Oil Terminals in the country (Keamari, Shikarpur, Mahmood Kot, Gatti & Machike) are the depot locations connected with pipelines. These are storages locations/depots as well as feeding source for other depots.

- Option of alternative routes to accommodate factors such as road closures, construction or seasonal variation (Snow fall, land sliding).
- Calculate the round-trip distance for each identified route using Physical Measurement/, Global Positioning System (GPS) / Geographical Information system, digital mapping, Remote sensing etc;).
- Calculate Round Trip Distance (RTD) of Kashmir based Retail outlets sites from Chaklala, Chakpirana and Machike, and identify the most suitable source for supply of each location in view of operational feasibility (for e.g. Dadyal area is currently marked from Chakpirana only but can be executed from Chaklala as well).

- Note:** 1. In respect of Primary Freight , in case, the destination points are scattered in a location, PSO depot location may be benchmarked as center point for distance calculation.
2. In respect of SFA location, the point of high population density, may be considered as center point for distance calculation.

3.1.3 Road Condition in respect of Primary and SFAs for prescribing the fuel consumption.

- Assess the road surface quality such as metaled, concrete, plain, hilly, kutchra, drainage issue etc. documenting the findings including Maps, Google Coordinates in respect of each such patch/segments site.
- Conduct on-site physical surveys to identify the potential hazards, abnormal segment/patches of the routes (distance and condition), which falls others than ‘plain’. Specify its nature, distance and possible pros and cos.
- Assess tank lorries/ trucks capacity suitable for transportation to these primary and SFA various sites and prescribe fuel consumption standard for each route. Mention any other relevant transportation cost factor and document any challenges/limitations.
- Pin point from where the Katchra/hilly area is starting till ending, in calculating Round Trip Distance.

3.1.4 To get specific re-assessment of SFAs sites. (At present, there are approximately 213 sites as SFA. Re-assessment of the same is necessitated based on current infrastructure and developments.

Distance:	Current Distance from the source i.e; Oil depot/terminal to destination via primary and alternate route.
Road Infrastructure:	Conveniences of access or otherwise. The condition of Road (metallic/carpeted/concrete/katchra, narrow, wide etc) and landscape (plain /hilly/terrain etc)
Optimal Load Capacity	Maximum capacity of the load feasible for transportation
Travel Time	Total travel time from source to destination
Fuel Consumption standard	Standard size of the TLS and average fuel consumption in respect of each SFA site
Potential Consumption of Fuel Products	Estimated Potential consumption of fuel products (HSD and Mogas) of each site, keeping in view of onsite estimated sale of existing retail outlets, economic activities and overall socio-economic standard of the residents of that site.
Economic Condition	Economic condition of the sites in view of infrastructure development, socio economic indicators etc.;

4. RECOMMENDATIONS

- Develop a set of recommendations based on the findings of the assessment, focusing on objective and scope of this assignment.

5. CONSULTATION WITH THE STAKEHOLDERS

- After the submission of report, the consultant, shall consult/present the findings to the stakeholders.
- Incorporate feedback into the final report.

6. DELIVERABLES

- A comprehensive report separately in respect of Primary and Special Freight Area survey, documenting the assessment process, findings, and recommendations and shall cover the maximum information and justification, not limited to the following;
 - Recommended detailed RTD map chart, from each source to destination, in respect of Primary Transportation and SFAs across the country, considering the safe and economic routes, analyzed with the authentic data published by the public sector.
 - Recommend alternate RTD map in respect of primary transportation areas and SFA across the country.
 - Road network condition at all routes with specific highlight on the patches segment as Plain, wide, narrow, hilly Katcha etc; The detail in this regard may be extended as much as it is necessary.
 - Prescribe the optimal Tank Lorries Size and Average Fuel Consumption rate in respect of primary transportation and various sites of SFAs, keeping in view of each recommended routes.
 - A report on the practical viability and prudence in respect of movement of petroleum product ex-sher shah SFAs. Recommend alternate source for x-shersshah sites, if feasible.
- Document all the relevant information including current as well as the anticipated future development which may impact the IFEM arrangements.
- In respect of SFA, Location-wise Report shall cover the additional information;
 - Potential consumption of fuel products (Diesel and Petrol) of each site, keeping in view of onsite estimated sale of each existing retail outlets, economic activities and overall socio-economic standard of the residents of that site.
 - Current social and economic conditions of the localities and future prospects (economic activities) of the same.
 - Law and order situation in each locality.
 - Report on the overall impact owing to inclusion of SFA in IFEM and recommendations for improvement.
- Conclusive Part:
 - In view of above, the Primary Freight Chart as per **Annex VI**.
 - Secondary Freight Chart as per **Annex VII**.

7. DURATION OF SURVEY

Complete task has to be completed within 120 days from the award of the contract.

- First draft report in 90 days.
- Final Report in next 30 days

SELECTION OF FIRM

SURVEY / REASSESSMENT OF PRIMARY AND SPECIAL FREIGHT AREA (SFA)

(TECHNICAL - EVALUATION CRITERIA)

	Clause	Description	Points
1.	Work Protocol	a. Organizational structure of the firm b. Comprehensive approach and use of skill for completion of assignment/understanding of task requirement. c. Complete methodology highlighting schedule and planning for the completion of task. Sub-Total	10 15 15 40
2.	Relevant Experience of Organization	a. Total work experience of the firm in undertaking the Road Distance calculation and survey/assessment of Road infrastructure. b. The Technical worth of the firm regarding utilization of latest IT tools for mapping, GIS, Road Assessment c. Total Experience of the Firm related to logistic of petroleum products d. Specific experience of the firm regarding economic and social impact assessment. Sub-Total	10 10 10 30
3.	Team	Detailed CVs of the team members, giving names, qualification, employment record, professional experience, Skill while highlighting respective roles within the team. Sub-Total	30 30
		TOTAL MARKS/POINTS	100

NOTE; Minimum requirements for pre-qualification shall be 70 Marks/Points
